-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: page 1, paragraph 0002, line 2, "defined by the preamble claim1" The specification contains references to claims such as paragraph [0002], line 2, which do not contribute to the written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same, or set forth the best mode contemplated by the inventor of carrying out his invention. The references to the claims should be deleted from the text of the specification as required.

Appropriate correction is required.

Claim Objections

2. Claims 5 and 6 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4 and 5 have not been further treated on the merits.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3747

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Stiefel et al. (5,937,734).

Stiefel et al. disclose a high-pressure pump for a fuel injection system of an internal combustion engine, having a rotationally driven drive shaft (14) that has a shaft portion (27), embodied eccentrically to the axis of rotation (A) of the drive shaft, on which portion a ring (28) is rotatably supported, and having at least one pump element that has a pump piston (35), driven at least indirectly in a reciprocating motion by the drive shaft (14) via the ring (28), which piston rests at least indirectly on the ring (28), characterized in that the ring (28) is provided, at least on its outer face facing away from the shaft portion (27), with a coating (40') of a friction-reducing paint in at least one region (34), in which the at least one pump piston (35) rests at least indirectly on the ring (28), see figures 1,2 and 4.

Regarding claim 2, the ring (28), on its circumference, has at least one flat face (34), on which the pump piston (35) rests at least indirectly and which is provided with the coating (40') of friction-reducing paint.

Allowable Subject Matter

5. Claims 3 and 4 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references show high-pressure pumps.
